

Illustrator Mini-Project

Computer Literacy

Ms. Mitchell

The title of our Mini-Project is “My Monster has a Name.”

Using the tools we have learned so far in Adobe Illustrator (shapes, colors, stroke and fill, gradients, etc.) create a unique monster. This monster should contain several gradients designed to give dimension and a 3-d effect to the shapes that make up its body. Think of how to group elements in the monster so they move as one.

The final artwork should be recognizable as a being of some sort, not just a random arrangement of shapes.

When you are all done with your monster, come up with a name for it. We will be adding its name to the artwork at the end of the project.

We will have through the end of this week to complete the monster.
